## **Extended Minerals (Cobalt and Mica Statement)**

Cobalt and mica, despite not being official conflict minerals, still have major concerns on both how and where they are sourced. Although no official compliance regulations exist in the United States or European Union to control these, Accurate Manufactured Products Group (AMPG) is still committed to sourcing responsibly. Based on our knowledge, no cobalt or mica is intentionally added to our products during the production process, and we will provide necessary documents for all traceable materials.

Sincerely,

AMPG Quality Team
