Toxic Substances Control Act of 1976

The Toxic Substances Control Act (TSCA) of 1976 “addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.”¹ This act was later updated on June 22, 2016 when the Frank R. Lautenberg Chemical Safety for the 21st Century act was passed into law. Full text of the TSCA can be found on the EPA website here: <https://www.epa.gov/laws-regulations/summary-toxic-substances-control-act>

We here at Accurate Manufactured Products Group (AMPG) recognize the necessity of such regulation, and work to ensure we meet regulation requirements. To the best of our current knowledge and understanding, AMPG is in full compliance with this act, and all our products currently meet the TSCA requirements. Material test reports of the raw material used to machine our parts are kept within our database system and are available upon request.

Sincerely,

AMPG Quality Team
